AH-24

WORK SMARTER NOT HARDER

REPAIRS JUST GOT EASIER

POWERFUL, PORTABLE AND PRECISE

The AH-24 series allows for faster repairs and better metal finishes. For the times when you can't bring your work to the machine, this handheld air planisher helps you create or repair without having to disassemble the project. With two versions available, the AH-24 has all the right features for you.

SPECIFICATIONS

- swivel lower die allows the lower die to pivot to contours in the material
- captured top die: rubber o-ring detent keeps the top die from falling out when hinge is opened or when material is removed
- adjustable handle for better control
- rigid spine option
- hinge spine option allows for quick opening of the throat area for hard to reach work areas on the material
- 24" maximum adjustable throat depth comes standard
- foot pedal control keeps both hands free
- optional stand with 51" work height
- 16 gauge mild steel capacity
- 90 to 120 psi working pressure
- 3200 bpm
- automatic oiler on regulator
- included tooling: 2" flat top; 0r, 2r, 3r, 6r, 8r, 12r, 24r, and 36r lowers
- other lower tooling available: 0r, 1.5r, 36r, and 48r
