

SE Tube Bending Software - BT-Super

Product Images

Create tube parts using an XYZ interface which consists of end points, bend locations, and center line radii. Bend-Tech software will show LRA (Length, Rotation, and Bend Angle) data as well as cut length, spring back data, and weights.

The Spring Back Calculator has an area to enter the angles of spring back experienced after bending which allows the software to automatically make the necessary adjustments. The "Results" and setup sheet have an additional column which includes the spring back angles.

Short Description

Additional Information

Stock Number	BA9-1002159
Model Number	BT-Super
Prop 65	Cancer and Reproductive Harm
Warranty	1 Year
Gross Weight	1.0
